DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of the restriction requirement of a single disclosed species, Fig. 5 including claims 148-150, for prosecution in the reply filed on 12/20/2006 is acknowledged. The traversal is on the ground(s) that "no serious burden is created for the Examiner by running a simultaneously computerized search of the subject matter identified, for example, in Fig. 4 and Fig. 5. A single search of the subject matter of Fig. 5, for example, would yield results of the subject matter of Fig. 4 without any undue burden on the Examiner" is not persuasive because Applicant contradicts him/herself. Because if the subject matter of Fig. 5 and Fig. 4 are the same then Applicant does not need to disclose two different Fig. 4 and Fig. 5. Moreover, if the subject matter of Fig. 4 and Fig. 5 are the same subject matter, as alleged by Applicant, then there is no need for the Applicant to suggest the Examiner to do a simultaneously computerized search, i.e., two different queries of searches.

As such, the requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States

Art Unit: 2623

only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 148-150 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Hunter et al. (US 2002/0056118).

Claim 148, Hunter discloses a method of implementing a media content delivery and playback scheme (Summary, § 0012); the method comprising the steps of:

Receiving media content which is delivered asynchronously via a communication channel (§0012); and

Enabling the playback of the media content at a predetermined time after the receipt of the media content (§0012 and §0117).

Claim 149, Hunter further discloses the step of detecting the media content at the predetermined time (§§0121-0122).

Claim 150, Hunter further discloses the step of providing a notification of receipt of the media content (§0139).
